

KR800 MAX

Output of up to 1500 kg/hr

Features:

- High production output of up to 1500kg/hr
- Visualization of the whole production process
- Integrated quality control system
- Manual incl. video explanations are integrated in the machine
- Integrated service and maintenance intervals
- Reduction of idle times like changeover time and pre-heating time
- Faster milling unit for sockets and spigots
- Profiles have been optimized to reach minimum pipe weights in the appropriate SN classes
- Almost complete data recording for cost analysis (incl. electricity and gas meter); the production costs are available straight after pipe production and serve as sample for new projects (pre-calculation)
- Machine is safe against operating errors by various plausibility checks

Production of Krah machines by KAT GmbH (Krah Advanced Technologies)
